

# **National Cancer Patient Experience Survey**

**2016 Results**

**NHS North East Lincolnshire  
Clinical Commissioning Group**

**Published July 2017**

The National Cancer Patient Experience Survey is  
undertaken by Quality Health on behalf of NHS England

## Introduction

The National Cancer Patient Experience Survey 2016 is the sixth iteration of the survey first undertaken in 2010. It has been designed to monitor national progress on cancer care; to provide information to drive local quality improvements; to assist commissioners and providers of cancer care; and to inform the work of the various charities and stakeholder groups supporting cancer patients.

The survey was overseen by a national Cancer Patient Experience Advisory Group. This Advisory Group set the principles and objectives of the survey programme and guided questionnaire development.

The survey was commissioned and managed by NHS England. The survey provider, Quality Health, is responsible for designing, running and analysing the survey.

Full national results and other reports are available at [www.ncpes.co.uk](http://www.ncpes.co.uk).

Further details on the survey methodology and changes to the 2016 survey can be found in the Annex.

## This report

The report shows how this CCG scored for each question in the survey, compared with national results. It is aimed at helping individual CCGs to understand their performance and identify areas for local improvement.

Note that responses for questions with 1-20 respondents have been suppressed. This is to protect patient confidentiality and because uncertainty around the result is too great.

## Data tables

The data tables presented in this report show the following for each question:

- **Column 1** shows the number of respondents for 2015 to this question
- **Column 2** shows the unadjusted 2015 score for this CCG
- **Column 3** shows the number of respondents for 2016 to this question
- **Column 4** shows the unadjusted 2016 score for this CCG
- **Column 5** shows whether a score has significantly increased or decreased compared with the last survey
- **Column 6** shows the case-mix adjusted 2016 score for this CCG
- **Column 7** shows the lower limit of the expected range of case-mix adjusted scores for this CCG (the top of the pale blue section on the comparability chart - see below)
- **Column 8** shows the upper limit of the expected range of case-mix adjusted scores for this CCG (the bottom of the dark blue section on the comparability chart - see below)
- **Column 9** shows the national average score for this question.

Results for individual response options are presented in the detailed data tables available at [www.ncpes.co.uk](http://www.ncpes.co.uk) . Confidence Intervals for unadjusted and case-mix adjusted data are provided in these tables.

Expected ranges and 95% confidence intervals highlight the uncertainty around the results. The size of the expected ranges and confidence intervals will be different for each question, and depends on the number of respondents and the range of their responses.

For further details on case-mix adjustment and the scoring methodology used, please refer to the Annex.

### **Comparability charts**

For the 2016 survey, we have adopted the CQC standard for reporting comparative performance, based on calculation of "expected ranges". This means that CCGs will be flagged as outliers only if there is statistical evidence that their scores deviate (positively or negatively) from the range of scores that would be expected for CCGs of the same size.

The comparability charts in this report show a bar with these expected ranges (in grey), higher than expected (in dark blue), and lower than expected (in pale blue). A black dot represents the actual score of this CCG.

The same colour convention has been used in Column 6 of the data tables.

For further details on expected ranges, please refer to the technical document at [www.ncpes.co.uk](http://www.ncpes.co.uk) .

### **Tumour group tables**

The final set of tables in this report show the scores for each question for each of the 13 tumour groups, with a comparative national score for that tumour group.

These breakdowns are intended as additional information for CCGs to understand the differences between the experiences of patients with different types of cancer. The numbers are generally relatively small and may not be statistically significant. They should therefore be treated with some caution.

### **Notes on specific questions**

Questions used to direct respondents to different parts of the survey (questions 4, 24, 27, 40, 43, 46) and other demographic and information questions are not reported.

### **How to use the data**

Unadjusted data should be used to see the actual responses from patients relating to the CCG.

Case-mix adjusted data, together with expected ranges, should be used to understand whether the results are significantly higher or lower than national results.

Case-mix adjusted data, together with (case-mix adjusted) confidence intervals (presented in the detailed data tables at [www.ncpes.co.uk](http://www.ncpes.co.uk) ), should be used to understand whether the results are significantly higher or lower than the results for another CCG.

### **Response rates**

Numbers of respondents by tumour group, age and gender can be found in the Annex.

## Executive Summary

Asked to rate their care on a scale of zero (very poor) to 10 (very good), respondents gave an average rating of **8.7**.

The following questions are included in phase 1 of the Cancer Dashboard developed by Public Health England and NHS England\*:

- **77%** of respondents said that they were definitely involved as much as they wanted to be in decisions about their care and treatment
- **91%** of respondents said that they were given the name of a Clinical Nurse Specialist who would support them through their treatment
- **92%** of respondents said that it had been 'quite easy' or 'very easy' to contact their Clinical Nurse Specialist
- **90%** of respondents said that, overall, they were always treated with dignity and respect while they were in hospital
- **91%** of respondents said that hospital staff told them who to contact if they were worried about their condition or treatment after they left hospital
- **60%** of respondents said that they thought the GPs and nurses at their general practice definitely did everything they could to support them while they were having cancer treatment.

Detailed results for these and other questions are set out in the sections that follow.

\* [www.cancerdata.nhs.uk/dashboard](http://www.cancerdata.nhs.uk/dashboard)

The questions were selected in discussion with the national Cancer Patient Experience Advisory Group and reflect four key patient experience domains: provision of information; involvement in decisions; care transition; interpersonal relations, respect and dignity. The figures presented above are all case-mix adjusted.

## Questions which scored outside expected range

Question	Number of respondents for this CCG	2016 Case-mix Adjusted			National Average Score	
		2016 Percentage for this CCG	Lower limit of expected range	Upper limit of expected range		
<b>Seeing your GP</b>						
Q1	Saw GP once / twice before being told had to go to hospital	215	71%	71%	82%	77%
<b>Diagnostic tests</b>						
Q6	The length of time waiting for the test to be done was about right	247	80%	83%	92%	87%
<b>Finding out what was wrong with you</b>						
Q8	Patient told they could bring a family member or friend when first told they had cancer	262	66%	70%	82%	76%
Q11	Patient given easy to understand written information about the type of cancer they had	236	65%	67%	78%	72%
<b>Clinical Nurse Specialist</b>						
Q18	Patient found it easy to contact their CNS	222	92%	82%	91%	86%
<b>Your overall NHS care</b>						
Q56	Overall the administration of the care was very good / good	274	83%	85%	93%	89%

## CCG results

### Seeing your GP

Question		Unadjusted Scores				Change from 2015	2016 Case Mix Adjusted			
		2015		2016			2016 Score	Expected range - lower	Expected range - upper	National Average Score
		Number of respondents	Score	Number of respondents	Score					
Q1	Saw GP once / twice before being told had to go to hospital	202	75%	215	70%		71%	71%	82%	77%
Q2	Patient thought they were seen as soon as necessary	252	83%	276	80%		80%	79%	88%	83%

↑ or ↓ Indicates where 2016 score is significantly higher or lower than 2015 score  
 (NB: No arrow reflects no statistically significant change)  
 Where no score is displayed, no 2015 data is available  
 \* Indicates where a score has been suppressed because there are less than 21 respondents.

### Support for people with cancer

Question	Unadjusted Scores					2016 Case Mix Adjusted			
	2015	2016	2016		Change from 2015	2016 Score	Expected range - lower	Expected range - upper	National Average Score
Number of respondents	Score	Number of respondents	Score						
Q20 Hospital staff gave information about support groups	198	80%	213	79%		80%	78%	90%	84%
Q21 Hospital staff gave information about impact cancer could have on day to day activities	177	82%	189	80%		82%	76%	87%	81%
Q22 Hospital staff gave information on getting financial help	162	60%	169	54%		55%	49%	64%	56%
Q23 Hospital staff told patient they could get free prescriptions	132	83%	118	78%		78%	73%	88%	80%

↑ or ↓ Indicates where 2016 score is significantly higher or lower than 2015 score (NB: No arrow reflects no statistically significant change)  
Where no score is displayed, no 2015 data is available  
\* Indicates where a score has been suppressed because there are less than 21 respondents.

## CCG results

### Operations

Question	Unadjusted Scores					2016 Case Mix Adjusted			
	2015		2016		Change from 2015	2016 Score	Expected range - lower	Expected range - upper	National Average Score
	Number of respondents	Score	Number of respondents	Score					
Q25	-	-	148	95%		96%	92%	99%	96%
Q26	127	80%	148	79%		79%	72%	85%	79%

↑ or ↓ Indicates where 2016 score is significantly higher or lower than 2015 score  
 (NB: No arrow reflects no statistically significant change)  
 Where no score is displayed, no 2015 data is available  
 \* Indicates where a score has been suppressed because there are less than 21 respondents.

 (NB: No arrow reflects no statistically significant change)  
 Where no score is displayed, no 2015 data is available  
 \* Indicates where a score has been suppressed because there are less than 21 respondents.

## Comparisons by tumour group for this CCG

The following tables show the unadjusted CCG and the national percentage scores for each question broken down by tumour group. Where a cell in the table contains an asterisk this indicates that the number of patients in that group was below 21 and too small to display. Where a cell in the table contains "n.a." this indicates that there were no respondents for that tumour group.

### Seeing your GP

## Annex

### Methodology

The sample for the survey included all adult (aged 16 and over) NHS patients, with a confirmed primary diagnosis of cancer, discharged from an NHS Trust after an inpatient episode or day case attendance for cancer related treatment in the months of April, May and June 2016.

The patients included in the sample had relevant cancer ICD10 codes (C00-99 excluding C44 and C84, and D05) in the first diagnosis field of their patient records, applied to their patient files by the relevant NHS Trust, and were alive at the point at which fieldwork commenced. Deceased checks were undertaken on up to three occasions during fieldwork, to ensure that questionnaires were not sent to patients who had died since their treatment.

Trust samples were checked rigorously for duplicates and patient lists were also de-duplicated nationally to ensure that patients did not receive multiple copies of questionnaires.

The fieldwork for the survey was undertaken between October 2016 and March 2017.

The survey used a mixed mode methodology. Questionnaires were sent by post with two reminders where necessary, but also included an option to complete online. A Freephone helpline was available for respondents to ask questions about the survey, to enable them to complete their questionnaires over the phone, and to provide access to a translation and interpreting facility for those whose first language was not English.

The Health Research Authority supported the survey by granting Section 251 approval.

### Further information

Further information on survey methodology, as well as all of the national and local reports and data, is available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

### Redevelopment of the 2016 survey

The following changes have been made to the National Cancer Patient Experience Survey in 2016:

- question 5 and 25 are no longer presented in a tick all that apply format and their response options have been revised. This has allowed the questions to be scored and presented in the comparability charts, data tables and tumour group tables. Because of these changes, no comparison with 2015 results is possible
- question 8 has had a response option removed. Because of this change, no comparison with 2015 results is possible.

### Official Statistics

The 2016 survey data has been produced and published in line with the Code of Practice for Official Statistics.

## Scoring methodologies

49 of the 50 questions relating directly to patient experience have been summarised as the score of the percentage of patients who reported a positive experience. For example:

- question 6 asks: "Overall, how did you feel about the length of time you had to wait for your test to be done?". Responses have been recorded as positive only for those patients who selected the first option ("It was about right")
- question 11 asks: "When you were told you had cancer, were you given written information about the type of cancer you had?". Responses have been recorded as positive only for those patients who selected the first option ("Yes, and it was easy to understand").

Where options do not provide any information on positive/negative patient experience (e.g. "Don't know / can't remember"), they are excluded from the score.

The other question (question 59) asks respondents to rate their overall care on a scale of 0 to 10. Scores have been given as an average on this scale.

A copy of the 2016 questionnaire, marked up with all of these scoring conventions, is available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

Further details on the scoring methodology can be found in the technical document for the survey, available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

## Case-mix adjustment

As in 2015, case-mix adjusted findings are being presented alongside unadjusted results for CCGs. Case-mix adjustment allows us to account for the impact that differing patient populations might have on results. By using the case-mix adjusted estimates we can obtain a greater understanding of how a CCG is performing given their patient population.

The factors taken into account in this case-mix adjustment are gender, age, ethnic group, deprivation, and tumour group.

For further details on case-mix adjustment, please refer to the technical document for the survey, available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

## Statistical significance

In the reporting of 2016 results, appropriate statistical tests have been undertaken to identify any changes between 2015 and 2016 unadjusted scores which are 'statistically significant'. 'Statistically significant' means that you can be very confident that any change between scores is real and not due to chance.

For further details on statistical significance, please refer to the technical document for the survey, available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

## Response Rates

	Sample Size	Excluded	Adjusted Sample	Not Returned	Blank / Refused	Completed	Response Rate
National	118,253	8,590	109,663	33,035	3,840	72,788	67%
03H	481	50	431	132	16	283	66%

## Respondents by tumour group

The tables below show the numbers of patients from each tumour group and the age and gender distribution of these patients.

Tumour Group	Number of respondents*
Brain / CNS	2
Breast	34
Gynaecological	5
Colorectal / LGT	29
Lung	22
Skin	3
Haematological	45
Upper Gastro	13
Other	49
Urological	45
Prostate	25
Sarcoma	3
Head and Neck	8

\* These figures may not match the numerator for all questions in the 'Comparisons by tumour group' section of this report, because not all questions were answered by all respondents.

## Respondents by age and gender

The questionnaire asked respondents to give their year of birth. This information has been amalgamated into 8 age bands. The age and gender distribution for the CCG was as follows:

	16-24	25-34	35-44	45-54	55-64	65-74	75-84	85+	Total
Male	0	1	2	11	26	54	48	7	149
Female	0	1	3	18	32	48	26	6	134
Total	0	2	5	29	58	102	74	13	283

Quality Health is a specialist health and social care survey organisation, working for public, private and not-for-profit sectors, in the UK and overseas.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, and all Health Boards in Scotland, Wales and Northern Ireland.

Quality Health is an approved contractor for the Care Quality Commission's patient survey programmes, NHS England's National Staff Survey programme, and the national Patient Reported Outcome Measures (PROMs).

Further information on Quality Health is available at [www.quality-health.co.uk](http://www.quality-health.co.uk)

Further information on the National Cancer Patient Experience Survey, as well as all of the national and local reports and data, is available [www.ncpes.co.uk](http://www.ncpes.co.uk)
