

National Cancer Patient Experience Survey

2015 Results

**NHS North Tyneside
Clinical Commissioning Group**

Published July 2016

The National Cancer Patient Experience Survey is undertaken by Quality Health on behalf of NHS England

Introduction

The National Cancer Patient Experience Survey 2015 is the fifth iteration of the survey first undertaken in 2010. It has been designed to monitor national progress on cancer care; to provide information to drive local quality improvements; to assist commissioners and providers of cancer care; and to inform the work of the various charities and stakeholder groups supporting cancer patients.

The survey was overseen by a national Cancer Patient Experience Advisory Group. This Advisory Group set the principles and objectives of the survey programme and guided questionnaire development.

The survey was commissioned and managed by NHS England. The survey provider, Quality Health, is responsible for designing, running and analysing the survey.

Full national results and other reports are available at www.ncpes.co.uk

Further details on the survey methodology and changes to the 2015 survey can be found in the Annex. Note that a number of significant changes were made to the 2015 survey so caution should be taken in directly comparing data from the 2015 survey to the findings of the previous CPES surveys. No comparisons with previous surveys are presented in this report.

This report

The report shows how this CCG scored for each question in the survey, compared with national results. It is aimed at helping individual CCGs to understand their performance and identify areas for local improvement.

Note that responses for questions with 1-20 respondents have been suppressed. This is to protect patient confidentiality and because uncertainty around the result is too great.

Data tables

The data tables presented in this report show the following for each question:

- **Column 1** shows the number of respondents to this question
- **Column 2** shows the unadjusted 2015 score for this CCG
- **Column 3** shows the case-mix adjusted 2015 score for this CCG
- **Column 4** shows the lower limit of the expected range of scores for this CCG (the top of the pale blue section on the Comparability chart - see below)
- **Column 5** shows the upper limit of the expected range of scores for this CCG (the bottom of the dark blue section on the Comparability chart - see below)
- **Column 6** shows the National Average score for this question.

Results for individual response options are presented in the detailed data tables www.ncpes.co.uk
Confidence Intervals for unadjusted and case-mix adjusted data are provided in these tables.

Expected ranges and 95% Confidence Intervals highlight the uncertainty around the results. The size of the expected ranges and confidence intervals will be different for each question, and depends on the number of respondents and the range of their responses.

For further details on case-mix adjustment and the scoring methodology used, please refer to the Annex.

Comparability charts

For the 2015 survey, we have adopted the CQC standard for reporting comparative performance, based on calculation of "expected ranges". This means that CCGs will be flagged as outliers only if there is statistical evidence that their scores deviate (positively or negatively) from the range of scores that would be expected for CCGs of the same size.

The Comparability charts in this report show a bar with these expected ranges (in grey), higher than expected (in dark blue), and lower than expected (in pale blue). A black dot represents the actual score of this CCG.

The same colour convention has been used in Column 3 of the Data tables.

For further details on expected ranges, please refer to the technical document at www.ncpes.co.uk

Tumour group tables

The final set of tables in this report show the scores for each question for each of the 13 tumour groups, with a comparative national score for that tumour group.

These breakdowns are intended as additional information for CCGs to understand the differences between the experiences of patients with different types of cancer. The numbers are generally relatively small and may not be statistically significant. They should therefore be treated with some caution.

Notes on specific questions

Question 5 in the survey has not been scored. However, the unscored data is useful and has been published alongside the other results in this report. This question asked respondents to "tick all that apply". The results show all of the responses given including where respondents chose two or more options.

Questions used to direct respondents to different parts of the survey (questions 4, 17, 24, 27, 40, 43, 46) and other demographic and information questions are not reported.

How to use the data

Unadjusted data should be used to see the actual responses from patients relating to the CCG.

Case-mix adjusted data, together with expected ranges, should be used to understand whether the results are significantly higher or lower than national results.

Case-mix adjusted data, together with (case-mix adjusted) Confidence Intervals (presented in the detailed data tables www.ncpes.co.uk), should be used to understand whether the results are significantly higher or lower than the results for another CCG.

Response rates

Numbers of respondents by tumour group, age and gender can be found in the Annex.

Executive Summary

Asked to rate their care on a scale of zero (very poor) to 10 (very good), respondents gave an average rating of **9.0**.

The following questions are included in phase 1 of the Cancer Dashboard developed by Public Health England and NHS England*:

- **84%** of respondents said that they were definitely involved as much as they wanted to be in decisions about their care and treatment
- **91%** of respondents said that they were given the name of a Clinical Nurse Specialist who would support them through their treatment
- when asked how easy or difficult it had been to contact their Clinical Nurse Specialist **90%** of respondents said that it had been 'quite easy' or 'very easy'
- **87%** of respondents said that, overall, they were always treated with dignity and respect they were in hospital
- **94%** of respondents said that hospital staff told them who to contact if they were worried about their condition or treatment after they left hospital
- **63%** of respondents said that they thought the GPs and nurses at their general practice definitely did everything they could to support them while they were having cancer treatment.

Detailed results for these and other questions are set out in the sections that follow.

* www.cancerdata.nhs.uk/dashboard

The questions were selected in discussion with the national Cancer Patient Experience Advisory Group and reflect four key patient experience domains: provision of information; involvement in decisions; care transition; interpersonal relations, respect and dignity. The figures presented above are all case-mix adjusted.

Questions which scored outside expected range

Question	Number of respondents for this CCG	2015 Case-mix Adjusted			National Average Score	
		2015 Percentage for this CCG	Lower limit of expected range	Upper limit of expected range		
Seeing your GP						
Q1	Saw GP once / twice before being told had to go to hospital	262	82%	71%	81%	76%
Q2	Patient thought they were seen as soon as necessary	328	87%	78%	86%	82%
Diagnostic tests						
Q7	Given complete explanation of test results in understandable way	292	85%	74%	83%	79%
Deciding the best treatment for you						
Q13	Possible side effects explained in an understandable way	320	80%	68%	78%	73%
Q14	Patient given practical advice and support in dealing with side effects of treatment	322	73%	61%	71%	66%
Q15	Patient definitely told about side effects that could affect them in the future	300	63%	49%	60%	54%
Q16	Patient definitely involved in decisions about care and treatment	324	84%	73%	82%	78%
Hospital care as a day patient / outpatient						
Q41	Patient was able to discuss worries or fears with staff during visit	236	76%	64%	76%	70%
Q48	Patient given understandable information about whether chemotherapy was working	173	77%	61%	75%	68%
Home care and support						
Q50	Patient definitely given enough support from health or social services during treatment	201	68%	46%	62%	54%
Q51	Patient definitely given enough support from health or social services after treatment	122	62%	36%	54%	45%
Your overall NHS care						
Q54	Hospital and community staff always worked well together	317	67%	55%	67%	61%
Q59	Patient's average rating of care scored from very poor to very good	317	9.0	8.5	8.9	8.7

Q7	Given complete explanation of test results in understandable way	292	85%	85%	74%	83%	79%

Finding out what was wrong with you

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q8 Patient told they could bring a family member or friend when first told they had cancer	269	76%	77%	74%	84%	79%
Q9 Patient felt they were told sensitively that they had cancer	328	84%	85%	80%	88%	84%
Q10 Patient completely understood the explanation of what was wrong	329	74%	74%	68%	78%	73%
Q11 Patient given easy to understand written information about the type of cancer they had	293	75%	75%	66%	77%	72%

Finding out what was wrong with you

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q12 Patient felt that treatment options were completely explained	292	86%	86%	78%	87%	83%
Q13 Possible side effects explained in an understandable way	320	80%	80%	68%	78%	73%
Q14 Patient given practical advice and support in dealing with side effects of treatment	322	73%	73%	61%	71%	66%
Q15 Patient definitely told about side effects that could affect them in the future	300	63%	63%	49%	60%	54%
Q16 Patient definitely involved in decisions about care and treatment	324	84%	84%	73%	82%	78%

Clinical Nurse Specialist

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q17 Patient given the name of the CNS who would support them through their treatment	318	91%	91%	87%	93%	90%
Q18 Patient found it easy to contact their CNS	257	90%	90%	82%	91%	87%
Q19 Get understandable answers to important questions all or most of the time	244	92%	92%	85%	93%	89%

Support for people with cancer

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q20 Hospital staff gave information about support groups	241	79%	80%	78%	88%	83%
Q21 Hospital staff gave information about impact cancer could have on day to day activities	212	82%	82%	75%	86%	81%
Q22 Hospital staff gave information on getting financial help	211	60%	60%	48%	62%	55%
Q23 Hospital staff told patient they could get free prescriptions	142	78%	79%	74%	87%	80%

Operations

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q26 Staff explained how operation had gone in understandable way	166	84%	84%	71%	84%	78%

Hospital care as an inpatient (Part 1 of 3)

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q28 Groups of doctors or nurses did not talk in front of patient as if they were not there	196	85%	85%	76%	87%	81%
Q29 Patient had confidence and trust in all doctors treating them	196	87%	87%	79%	89%	84%
Q30 Patient's family or someone close definitely had opportunity to talk to doctor	156	73%	74%	65%	79%	72%
Q31 Patient had confidence and trust in all ward nurses	195	77%	77%	66%	79%	72%

Hospital care as an inpatient (Part 2 of 3)

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q32 Always / nearly always enough nurses on duty	192	68%	68%	59%	73%	66%
Q33 All staff asked patient what name they preferred to be called by	195	71%	70%	57%	76%	67%
Q34 Always given enough privacy when discussing condition or treatment	193	81%	81%	80%	90%	85%
Q35 Patient was able to discuss worries or fears with staff during visit	140	49%	50%	44%	60%	52%

Hospital care as an inpatient (Part 3 of 3)

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q36 Hospital staff definitely did everything to help control pain	167	79%	80%	78%	89%	84%
Q37 Always treated with respect and dignity by staff	192	86%	87%	83%	92%	87%
Q38 Given clear written information about what should / should not do post discharge	182	81%	81%	79%	90%	84%
Q39 Staff told patient who to contact if worried post discharge	184	93%	94%	90%	97%	94%

Hospital care as a day patient / outpatient (Part 1 of 2)

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q41 Patient was able to discuss worries or fears with staff during visit	236	76%	76%	64%	76%	70%
Q42 Doctor had the right notes and other documentation with them	290	97%	97%	93%	98%	96%
Q44 Beforehand patient had all information needed about radiotherapy treatment	69	86%	86%	78%	94%	86%
Q45 Patient given understandable information about whether radiotherapy was working	56	61%	61%	47%	72%	60%

Hospital care as a day patient / outpatient (Part 2 of 2)

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q47 Beforehand patient had all information needed about chemotherapy treatment	184	82%	82%	79%	90%	84%
Q48 Patient given understandable information about whether chemotherapy was working	173	77%	77%	61%	75%	68%

Home care and support

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q49 Hospital staff gave family or someone close all the information needed to help with care at home	268	62%	62%	52%	63%	58%
Q50 Patient definitely given enough support from health or social services during treatment	201	68%	68%	46%	62%	54%
Q51 Patient definitely given enough support from health or social services after treatment	122	61%	62%	36%	54%	45%

Care from your general practice

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q52 GP given enough information about patient's condition and treatment	293	98%	98%	93%	98%	95%
Q53 Practice staff definitely did everything they could to support patient	239	63%	63%	56%	69%	63%

Your overall NHS care (Part 1 of 2)

99C

Question	Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
			2015 Score	Expected range - lower	Expected range - upper	
Q54 Hospital and community staff always worked well together	317	67%	67%	55%	67%	61%
Q55 Patient given a care plan	237	36%	38%	27%	39%	33%
Q56 Overall the administration of the care was very good / good	324	91%	91%	85%	92%	89%
Q57 Length of time for attending clinics and appointments was right	324	70%	70%	59%	73%	66%

Your overall NHS care (Part 2 of 2)

Question		Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
				2015 Score	Expected range - lower	Expected range - upper	
Q58	Taking part in cancer research discussed with patient	308	25%	26%	21%	36%	28%

Question		Number of respondents	2015 Unadjusted Score	2015 Case-mix Adjusted			National Average Score
				2015 Score	Lower limit of expected range	Upper limit of expected range	
Q59	Patient`s average rating of care scored from very poor to very good	317	9.0	9.0	8.5	8.9	8.7

Comparisons by tumour group for this CCG

The following tables show the unadjusted CCG and the national percentage scores for each question broken down by tumour group. Where a cell in the table contains an asterisk this indicates that the number of patients in that group was below 21 and too small to display. Where a cell in the table contains "n.a." this indicates that there were no respondents for that tumour group.

Annex

Methodology

The sample for the survey included all adult (aged 16 and over) NHS patients, with a confirmed primary diagnosis of cancer, discharged from an NHS Trust after an inpatient episode or day case attendance for cancer related treatment in the months of April, May and June 2015.

The patients included in the sample had relevant cancer ICD10 codes (C00-99 excluding C44 and C84, and D05) in the first diagnosis field of their patient records, applied to their patient files by the relevant NHS Trust, and were alive at the point at which fieldwork commenced. Deceased checks were undertaken on up to three occasions during fieldwork, to ensure that questionnaires were not sent to patients who had died since their treatment.

Trust samples were checked rigorously for duplicates and patient lists were also de-duplicated nationally to ensure that patients did not receive multiple copies of questionnaires.

The fieldwork for the survey was undertaken between October 2015 and March 2016.

For the first time, the survey used a mixed mode methodology. Questionnaires were sent by post with two reminders where necessary, but also included an option to complete online. A Freephone helpline was available for respondents to ask questions about the survey, to enable them to complete their questionnaires over the phone, and to provide access to a translation and interpreting facility for those whose first language was not English.

The Health Research Authority supported the survey by granting Section 251 approval.

Further information

Further information on survey methodology, as well as all of the national and local reports and data, is available at www.ncpes.co.uk

Redevelopment of the 2015 survey

A number of significant changes have been made to the National Cancer Patient Experience Survey in 2015:

- the length of the questionnaire has been reduced
- response options have been reviewed and changed to make them consistent throughout the survey
- some of the questions and / or answer options have been changed so that they are now in line with questions in other patient surveys (e.g. the Care Quality Commission national patient surveys), to improve comparability between them
- the topic areas within the questionnaire have been redesigned to capture the whole patient journey.

There are 50 questions in the questionnaire that relate directly to patient experience. Of these, 14 remain unchanged from previous years; and a further 21 have been slightly amended. We draw caution in directly comparing data from the 2015 survey to the findings of the previous CPES surveys, even for identical questions. Changes in the structure of the survey instrument (questionnaire) and also the administration of the survey (calendar period and length of time from sampling to field work start and completion) may influence nationwide averages, although these features will not greatly impact on relative comparisons (e.g. between patient groups or hospitals).

The other 15 questions are either new or substantially changed from previous years.

It is expected that there will be few, if any changes, to the questionnaire going forward so we will be able to compare the results year on year. Where changes are necessary they are expected to be for methodological reasons or to improve question reliability.

Another significant change in 2015 is that an online version of the questionnaire has been developed. The online version was developed to make the questionnaire more accessible for respondents. This may have an impact on the demographic characteristics of the respondents. This may be an improvement if previously underrepresented groups have responded. However, changes to the demographics of respondents may have implications on the overall results - and again, leads us to draw caution in directly comparing results with previous years.

Official Statistics

The 2015 survey data has been published for the first time as Official Statistics. The 2015 survey data has been produced and published in line with the Code of Practice for Official Statistics.

Scoring methodologies

49 of the 50 questions relating directly to patient experience have been summarised as the score of the percentage of patients who reported a positive experience. For example:

- question 6 asks: "Overall, how did you feel about the length of time you had to wait for your test to be done?". Responses have been recorded as positive only for those patients who selected the first option ("It was about right")
- question 11 asks: "When you were told you had cancer, were you given written information about the type of cancer you had?". Responses have been recorded as positive only for those patients who selected the first option ("Yes, and it was easy to understand").

Where options do not provide any information on positive/negative patient experience (e.g. "Don't know / can't remember"), they are excluded from the score.

The other question (question 59) asks respondents to rate their overall care on a scale of 0 to 10. Scores have been given as an average on this scale.

A copy of the 2015 questionnaire, marked up with all of these scoring conventions, is available at www.ncpes.co.uk

Further details on the scoring methodology can be found in the technical document for the survey, available at www.ncpes.co.uk

Case-mix adjustment

For the first time in 2015, case-mix adjusted findings are being presented alongside unadjusted results for CCGs. Case-mix adjustment allows us to account for the impact that differing patient populations might have on results. By using the case-mix adjusted estimates we can obtain a greater understanding of how a CCG is performing given their patient population.

The factors taken into account in this case-mix adjustment are gender, age, ethnic group, deprivation, and tumour group.

For further details on case-mix adjustment, please refer to the technical document for the survey, available at www.ncpes.co.uk

Response Rates

	Sample Size	Excluded	Adjusted Sample	Not Returned	Blank / Refused	Completed	Response Rate
National	116,991	8,719	108,272	33,168	3,918	71,186	66%
99C	536	41	495	146	18	331	67%

Respondents by tumour group

The tables below show the numbers of patients from each tumour group and the age and gender distribution of these patients.

Tumour Group	Number of respondents*
Brain / CNS	3
Breast	55
Gynaecological	10
Colorectal / LGT	46
Lung	29
Skin	11
Haematological	60
Upper Gastro	17
Other	12
Urological	52
Prostate	21
Sarcoma	5
Head and Neck	10

* These figures may not match the numerator for all questions in the 'Comparisons by tumour group' section of this report, because not all questions were answered by all respondents.

Respondents by age and gender

The questionnaire asked respondents to give their year of birth. This information has been amalgamated into 8 age bands. The age and gender distribution for the CCG was as follows:

	16-24	25-34	35-44	45-54	55-64	65-74	75-84	85+	Total
Male	0	2	6	13	36	55	49	11	172
Female	1	3	8	30	38	43	33	3	159
Total	1	5	14	43	74	98	82	14	331

Quality Health is a specialist health and social care survey organisation, working for public, private and not-for-profit sectors, in the UK and overseas.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, and all Health Boards in Scotland, Wales and Northern Ireland.

Quality Health is an approved contractor for the Care Quality Commission's patient survey programmes, NHS England's National Staff Survey programme, and the national Patient Reported Outcome Measures (PROMs).

Further information on Quality Health is available at www.quality-health.co.uk

Further information on the National Cancer Patient Experience Survey, as well as all of the national and local reports and data, is available at www.ncpes.co.uk
