

# **National Cancer Patient Experience Survey**

**2016 Results**

**United Lincolnshire Hospitals  
NHS Trust**

**Published July 2017**

The National Cancer Patient Experience Survey is  
undertaken by Quality Health on behalf of NHS England

## Introduction

The National Cancer Patient Experience Survey 2016 is the sixth iteration of the survey first undertaken in 2010. It has been designed to monitor national progress on cancer care; to provide information to drive local quality improvements; to assist commissioners and providers of cancer care; and to inform the work of the various charities and stakeholder groups supporting cancer patients.

The survey was overseen by a national Cancer Patient Experience Advisory Group. This Advisory Group set the principles and objectives of the survey programme and guided questionnaire development.

The survey was commissioned and managed by NHS England. The survey provider, Quality Health, is responsible for designing, running and analysing the survey.

Full national results and other reports are available at [www.ncpes.co.uk](http://www.ncpes.co.uk).

Further details on the survey methodology and changes to the 2016 survey can be found in the Annex.

## This report

The report shows how this Trust scored for each question in the survey, compared with national results. It is aimed at helping individual Trusts to understand their performance and identify areas for local improvement.

Note that responses for questions with 1-20 respondents have been suppressed. This is to protect patient confidentiality and because uncertainty around the result is too great.

## Data tables

The data tables presented in this report show the following for each question:

- **Column 1** shows the number of respondents for 2015 to this question
- **Column 2** shows the unadjusted 2015 score for this Trust
- **Column 3** shows the number of respondents for 2016 to this question
- **Column 4** shows the unadjusted 2016 score for this Trust
- **Column 5** shows whether a score has significantly increased or decreased compared with the last survey
- **Column 6** shows the case-mix adjusted 2016 score for this Trust
- **Column 7** shows the lower limit of the expected range of case-mix adjusted scores for this Trust (the top of the pale blue section on the comparability chart - see below)
- **Column 8** shows the upper limit of the expected range of case-mix adjusted scores for this Trust (the bottom of the dark blue section on the comparability chart - see below)
- **Column 9** shows the national average score for this question.

## 2016 National Cancer Patient Experience Survey United Lincolnshire Hospitals NHS Trust

Results for individual response options are presented in the detailed data tables available at [www.ncpes.co.uk](http://www.ncpes.co.uk) . Confidence Intervals for unadjusted and case-mix adjusted data are provided in these tables.

Expected ranges and 95% confidence intervals highlight the uncertainty around the results. The size of the expected ranges and confidence intervals will be different for each question, and depends on the number of respondents and the range of their responses.

For further details on case-mix adjustment and the scoring methodology used, please refer to the Annex.

### Comparability charts

For the 2016 survey, we have adopted the CQC standard for reporting comparative performance, based on calculation of "expected ranges". This means that Trusts will be flagged as outliers only if there is statistical evidence that their scores deviate (positively or negatively) from the range of scores that would be expected for Trusts of the same size.

The comparability charts in this report show a bar with these expected ranges (in grey), higher than expected (in dark blue), and lower than expected (in pale blue). A black dot represents the actual score of this Trust.

The same colour convention has been used in Column 6 of the data tables.

For further details on expected ranges, please refer to the technical document at [www.ncpes.co.uk](http://www.ncpes.co.uk) .

### Tumour group tables

The final set of tables in this report show the scores for each question for each of the 13 tumour groups, with a comparative national score for that tumour group.

These breakdowns are intended as additional information for Trusts to understand the differences between the experiences of patients with different types of cancer. The numbers are generally relatively small and may not be statistically significant. They should therefore be treated with some caution.

### Notes on specific questions

Questions used to direct respondents to different parts of the survey (questions 4, 24, 27, 40, 43, 46) and other demographic and information questions are not reported.

### **How to use the data**

Unadjusted data should be used to see the actual responses from patients relating to the Trust.

Case-mix adjusted data, together with expected ranges, should be used to understand whether the results are significantly higher or lower than national results.

Case-mix adjusted data, together with (case-mix adjusted) confidence intervals (presented in the detailed data tables at [www.ncpes.co.uk](http://www.ncpes.co.uk)), should be used to understand whether the results are significantly higher or lower than the results for another Trust.

### **Response rates**

Numbers of respondents by tumour group, age and gender can be found in the Annex.

## Executive Summary

Asked to rate their care on a scale of zero (very poor) to 10 (very good), respondents gave an average rating of **8.3**.

The following questions are included in phase 1 of the Cancer Dashboard developed by Public Health England and NHS England\*:

- **73%** of respondents said that they were definitely involved as much as they wanted to be in decisions about their care and treatment
- **85%** of respondents said that they were given the name of a Clinical Nurse Specialist who would support them through their treatment
- **86%** of respondents said that it had been 'quite easy' or 'very easy' to contact their Clinical Nurse Specialist
- **86%** of respondents said that, overall, they were always treated with dignity and respect while they were in hospital
- **92%** of respondents said that hospital staff told them who to contact if they were worried about their condition or treatment after they left hospital
- **58%** of respondents said that they thought the GPs and nurses at their general practice definitely did everything they could to support them while they were having cancer treatment.

Detailed results for these and other questions are set out in the sections that follow.

\* [www.cancerdata.nhs.uk/dashboard](http://www.cancerdata.nhs.uk/dashboard)

The questions were selected in discussion with the national Cancer Patient Experience Advisory Group and reflect four key patient experience domains: provision of information; involvement in decisions; care transition; interpersonal relations, respect and dignity. The figures presented above are all case-mix adjusted.

## Questions which scored outside expected range

Question	Number of respondents for this Trust	2016 Case-mix Adjusted			National Average Score	
		2016 Percentage for this Trust	Lower limit of expected range	Upper limit of expected range		
<b>Diagnostic tests</b>						
Q7	Given complete explanation of test results in understandable way	632	75%	76%	82%	79%
<b>Finding out what was wrong with you</b>						
Q11	Patient given easy to understand written information about the type of cancer they had	655	68%	69%	76%	72%
<b>Deciding the best treatment for you</b>						
Q13	Possible side effects explained in an understandable way	711	68%	69%	76%	72%
Q14	Patient given practical advice and support in dealing with side effects of treatment	696	60%	62%	70%	66%
Q15	Patient definitely told about side effects that could affect them in the future	657	49%	51%	58%	54%
Q16	Patient definitely involved in decisions about care and treatment	700	73%	75%	81%	78%
<b>Clinical Nurse Specialist</b>						
Q17	Patient given the name of the CNS who would support them through their treatment	682	85%	87%	93%	90%
<b>Support for people with cancer</b>						
Q20	Hospital staff gave information about support groups	555	76%	79%	89%	84%
Q21	Hospital staff gave information about impact cancer could have on day to day activities	493	76%	78%	85%	81%
<b>Hospital care as an inpatient</b>						
Q29	Patient had confidence and trust in all doctors treating them	413	77%	81%	88%	85%
Q30	Patient's family or someone close definitely had opportunity to talk to doctor	347	66%	68%	78%	73%
Q31	Patient had confidence and trust in all ward nurses	414	69%	70%	79%	74%
Q32	Always / nearly always enough nurses on duty	412	58%	60%	73%	67%
Q36	Hospital staff definitely did everything to help control pain	331	79%	80%	88%	84%
Q38	Given clear written information about what should / should not do post discharge	386	81%	82%	89%	86%

**2016 National Cancer Patient Experience Survey  
United Lincolnshire Hospitals NHS Trust**

Question	Number of respondents for this Trust	2016 Case-mix Adjusted			National Average Score
		Percentage for this Trust 2016	Lower limit of expected range	Upper limit of expected range	

**Hospital care as a day patient / outpatient**

Q41	Patient was able to discuss worries or fears with staff during visit	549	61%	67%	75%	70%
Q42	Doctor had the right notes and other documentation with them	633	91%	94%	97%	96%
Q47	Beforehand patient had all information needed about chemotherapy treatment	407	76%	80%	88%	84%
Q48	Patient given understandable information about whether chemotherapy was working	368	60%	63%	72%	67%

**Home care and support**

Q49	Hospital staff gave family or someone close all the information needed to help with care at home	591	48%	54%	62%	58%
Q50	Patient definitely given enough support from health or social services during treatment	345	42%	45%	61%	53%

**Care from your general practice**

Q52	GP given enough information about patient`s condition and treatment	585	93%	94%	97%	95%
-----	---	-----	-----	-----	-----	-----

**Your overall NHS care**

Q54	Hospital and community staff always worked well together	693	53%	56%	66%	61%
Q56	Overall the administration of the care was very good / good	719	82%	86%	92%	89%
Q59	Patient`s average rating of care scored from very poor to very good	704	8.3	8.6	8.9	8.7

	Number of respondents	Score	Number of respondents	Score						
Q59 Patient`s average rating of care scored from very poor to very good	794	8.5	704	8.4		8.3	8.6	8.9	8.7	

↑ or ↓ Indicates where 2016 score is significantly higher or lower than 2015 score  
(NB: No arrow reflects no statistically significant change)  
Where no score is displayed, no 2015 data is available  
\* Indicates where a score has been suppressed because there are less than 21 respondents.

## Comparisons by tumour group for this Trust

The following tables show the unadjusted Trust and the national percentage scores for each question broken down by tumour group. Where a cell in the table contains an asterisk this indicates that the number of patients in that group was below 21 and too small to display. Where a cell in the table contains "n.a." this indicates that there were no respondents for that tumour group.

### Seeing your GP

Cancer type	Q1. Saw GP once / twice before being told had to go to hospital		Q2. Patient thought they were seen as soon as necessary

## Annex

### Methodology

The sample for the survey included all adult (aged 16 and over) NHS patients, with a confirmed primary diagnosis of cancer, discharged from an NHS Trust after an inpatient episode or day case attendance for cancer related treatment in the months of April, May and June 2016.

The patients included in the sample had relevant cancer ICD10 codes (C00-99 excluding C44 and C84, and D05) in the first diagnosis field of their patient records, applied to their patient files by the relevant NHS Trust, and were alive at the point at which fieldwork commenced. Deceased checks were undertaken on up to three occasions during fieldwork, to ensure that questionnaires were not sent to patients who had died since their treatment.

Trust samples were checked rigorously for duplicates and patient lists were also de-duplicated nationally to ensure that patients did not receive multiple copies of questionnaires.

The fieldwork for the survey was undertaken between October 2016 and March 2017.

The survey used a mixed mode methodology. Questionnaires were sent by post with two reminders where necessary, but also included an option to complete online. A Freephone helpline was available for respondents to ask questions about the survey, to enable them to complete their questionnaires over the phone, and to provide access to a translation and interpreting facility for those whose first language was not English.

The Health Research Authority supported the survey by granting Section 251 approval.

### Further information

Further information on survey methodology, as well as all of the national and local reports and data, is available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

### Redevelopment of the 2016 survey

The following changes have been made to the National Cancer Patient Experience Survey in 2016:

- question 5 and 25 are no longer presented in a tick all that apply format and their response options have been revised. This has allowed the questions to be scored and presented in the comparability charts, data tables and tumour group tables. Because of these changes, no comparison with 2015 results is possible
- question 8 has had a response option removed. Because of this change, no comparison with 2015 results is possible.

### Official Statistics

The 2016 survey data has been produced and published in line with the Code of Practice for Official Statistics.

## Scoring methodologies

49 of the 50 questions relating directly to patient experience have been summarised as the score of the percentage of patients who reported a positive experience. For example:

- question 6 asks: "Overall, how did you feel about the length of time you had to wait for your test to be done?". Responses have been recorded as positive only for those patients who selected the first option ("It was about right")
- question 11 asks: "When you were told you had cancer, were you given written information about the type of cancer you had?". Responses have been recorded as positive only for those patients who selected the first option ("Yes, and it was easy to understand").

Where options do not provide any information on positive/negative patient experience (e.g. "Don't know / can't remember"), they are excluded from the score.

The other question (question 59) asks respondents to rate their overall care on a scale of 0 to 10. Scores have been given as an average on this scale.

A copy of the 2016 questionnaire, marked up with all of these scoring conventions, is available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

Further details on the scoring methodology can be found in the technical document for the survey, available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

## Case-mix adjustment

As in 2015, case-mix adjusted findings are being presented alongside unadjusted results for Trusts. Case-mix adjustment allows us to account for the impact that differing patient populations might have on results. By using the case-mix adjusted estimates we can obtain a greater understanding of how a Trust is performing given their patient population.

The factors taken into account in this case-mix adjustment are gender, age, ethnic group, deprivation, and tumour group.

For further details on case-mix adjustment, please refer to the technical document for the survey, available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

## Statistical significance

In the reporting of 2016 results, appropriate statistical tests have been undertaken to identify any changes between 2015 and 2016 unadjusted scores which are 'statistically significant'. 'Statistically significant' means that you can be very confident that any change between scores is real and not due to chance.

For further details on statistical significance, please refer to the technical document for the survey, available at [www.ncpes.co.uk](http://www.ncpes.co.uk)

## Response Rates

	Sample Size	Excluded	Adjusted Sample	Not Returned	Blank / Refused	Completed	Response Rate
National	118,253	8,590	109,663	33,035	3,840	72,788	67%
RWD	1,134	71	1,063	277	46	740	70%

## Respondents by tumour group

The tables below show the numbers of patients from each tumour group and the age and gender distribution of these patients.

Tumour Group	Number of respondents*
Brain / CNS	2
Breast	165
Gynaecological	53
Colorectal / LGT	96
Lung	21
Skin	6
Haematological	136
Upper Gastro	39
Other	10
Urological	52
Prostate	141
Sarcoma	2
Head and Neck	17

\* These figures may not match the numerator for all questions in the 'Comparisons by tumour group' section of this report, because not all questions were answered by all respondents.

## Respondents by age and gender

The questionnaire asked respondents to give their year of birth. This information has been amalgamated into 8 age bands. The age and gender distribution for the Trust was as follows:

	16-24	25-34	35-44	45-54	55-64	65-74	75-84	85+	Total
Male	0	3	3	11	68	169	109	5	368
Female	1	4	15	61	84	140	55	12	372
Total	1	7	18	72	152	309	164	17	740

Quality Health is a specialist health and social care survey organisation, working for public, private and not-for-profit sectors, in the UK and overseas.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, and all Health Boards in Scotland, Wales and Northern Ireland.

Quality Health is an approved contractor for the Care Quality Commission's patient survey programmes, NHS England's National Staff Survey programme, and the national Patient Reported Outcome Measures (PROMs).

Further information on Quality Health is available at [www.quality-health.co.uk](http://www.quality-health.co.uk)

Further information on the National Cancer Patient Experience Survey, as well as all of the national and local reports and data, is available [www.ncpes.co.uk](http://www.ncpes.co.uk)
