

# **Cancer Patient Experience Survey**

2021 Results

## **Birmingham and Solihull**

Published July 2022

## Executive Summary

Birmingham and Solihull has no scores above expected range

### Questions Below Expected Range

	Case Mix Adjusted Scores			England Score
	2021 Score	Lower Expected Range	Upper Expected Range	
Q3. Referral for diagnosis was explained in a way the patient could completely understand	<b>57%</b>	59%	70%	<b>64%</b>
Q7. Patient felt the length of time waiting for diagnostic test results was about right	<b>78%</b>	78%	86%	<b>82%</b>
Q9. Enough privacy was always given to the patient when receiving diagnostic test results	<b>92%</b>	93%	96%	<b>94%</b>
Q15. Patient was definitely told about their diagnosis in an appropriate place	<b>80%</b>	81%	87%	<b>84%</b>
Q16. Patient was told they could go back later for more information about their diagnosis	<b>78%</b>	79%	87%	<b>83%</b>
Q17. Patient had a main point of contact within the care team	<b>87%</b>	89%	95%	<b>92%</b>
Q21. Patient was definitely involved as much as they wanted to be in decisions about their treatment	<b>75%</b>	75%	83%	<b>79%</b>
Q25. A member of their care team helped the patient create a care plan to address any needs or concerns	<b>89%</b>	90%	96%	<b>93%</b>
Q27. Staff provided the patient with relevant information on available support	<b>86%</b>	86%	93%	<b>90%</b>
Q32. Patient's family, or someone close, was definitely able to talk to a member of the team looking after the patient in hospital	<b>47%</b>	54%	67%	<b>61%</b>
Q34. Patient was always able to get help from ward staff when needed	<b>70%</b>	72%	81%	<b>76%</b>
Q35. Patient was always able to discuss worries and fears with hospital staff	<b>61%</b>	62%	72%	<b>67%</b>
Q41_1. Beforehand patient completely had enough understandable information about surgery	<b>86%</b>	86%	92%	<b>89%</b>
Q49. Care team gave family, or someone close, all the information needed to help care for the patient at home	<b>49%</b>	50%	60%	<b>55%</b>
Q51. Patient definitely received the right amount of support from their GP practice during treatment	<b>34%</b>	36%	52%	<b>44%</b>
Q54. The right amount of information and support was offered to the patient between final treatment and the follow up appointment	<b>71%</b>	74%	83%	<b>78%</b>
Q55. Patient was given enough information about the possibility and signs of cancer coming back or spreading	<b>57%</b>	58%	67%	<b>63%</b>
Q58. Cancer research opportunities were discussed with patient	<b>35%</b>	35%	53%	<b>44%</b>

## Introduction

The National Cancer Patient Experience Survey 2021 is the 11th iteration of the survey first undertaken in 2010. It has been designed to monitor progress on cancer care; to provide information to drive local quality improvements; to assist commissioners and providers of cancer care; and to inform the work of the various charities and stakeholder groups supporting cancer patients.

The survey was overseen by a national Cancer Patient Experience Advisory Group. This Advisory Group set the principles and objectives of the survey programme and guided questionnaire development. The survey was commissioned and managed by NHS England. The survey provider, Picker, is responsible for designing, running and analysing the survey.

The 2021 survey involved 134 NHS Trusts. Out of 107,412 people, 59,352 people responded to the survey, yielding a response rate of 55%.

## Methodology

### Eligibility, fieldwork and survey methods

The sample for the survey included all adult (aged 16 and over) NHS patients, with a confirmed primary diagnosis of cancer, discharged from an NHS Trust after an inpatient episode or day case attendance for cancer related treatment in the months of April, May and June 2021. The fieldwork for the survey was undertaken between October 2021 and February 2022.

As in the previous six years, the survey used a mixed mode methodology. Questionnaires were sent by post, with two reminders where necessary, but also included an option to complete the questionnaire online. A Freephone helpline and email was available for respondents to opt out, ask questions about the survey, enable them to complete their questionnaire over the phone and provide access to a translation and interpreting facility for those whose first language was not English.

### Note on question comparability

The questionnaire was redeveloped for the 2021 National Cancer Patient Experience Survey. Due to the significant changes made to the questionnaire no trend data or year on year comparisons are presented in results, and comparisons to previous years' results should not be made.

### Case-mix adjustment

Both unadjusted and adjusted scores are presented in this report. Case-mix adjusted scores allows us to account for the impact that differing patient populations might have on results. By using the case-mix adjusted estimates we can obtain a greater understanding of how an ICS is performing given their patient population. The factors taken into account in this case-mix adjustment are gender, age, ethnic group, deprivation, and cancer type.

Unadjusted data should be used to see the actual responses from patients relating to the ICS. Case-mix adjusted data, together with expected ranges, should be used to understand whether the results are significantly higher or lower than national results taking account of the patient mix.

### Scoring methodology

Sixty-one questions from the questionnaire are scored as these questions relate directly to patient experience. For all but one question (Q59), the score shows the percentage of respondents who gave the most favourable response to a question. For Q59, respondents rate their overall care on a scale of 0 to 10, of which the average was calculated for this question's presented score. The percentages in this report have been rounded to the nearest percentage point. Therefore, in some cases the figures do not appear to add up to 100%.

## Suppression

### Question-level suppression

For scores where the base size per question is <11, the score will be suppressed and replaced with an asterisk (\*). The base size does not include non-scored response options.

### Double suppression

If any group within a particular sub-group breakdown (such as the tumour group breakdown) has <11 respondents, then the figure for this particular group is suppressed and replaced with an asterisk (\*).

If there is only one group within the sub-group breakdown that has <11 respondents, and is therefore suppressed, the group with the next lowest number of respondents is also suppressed and replaced with an asterisk (\*) (regardless if it is greater than or less than 11).

### Additional suppression

Additional suppression happens if only **one** ICS has a score suppressed. If this happens, we will suppress another ICS's results (both the ICS level and subgroup results for the question) based on the next lowest number of respondents for the score. We do this so that the national score cannot be used to work out the score for the individual ICS.

The same rule applies to groups in each subgroup breakdown. For example, if only **one** ICS has the 85+ age group suppressed for Q25 we will need to suppress another ICS's results for the 85+ age group on Q25. This suppression is based on the 85+ age group with the next lowest number of respondents for Q25.

## Understanding the results

This report shows how this ICS scored for each question in the survey compared with national results. It is aimed at helping individual ICSs to understand their performance and identify areas for local and regional improvement. Below is a description of the type of results presented within this report and how to understand them.

### Expected range charts

The expected range charts in this report show a bar with the lowest and highest score received for each question nationally. Within this bar, an expected range is given (in grey) and a black diamond represents the actual score for this ICS.

ICSs whose score is above the upper limit of the expected range (in the dark blue) are positive outliers, with a score statistically significantly higher than the national mean. This indicates that the ICS performs better than what ICSs of the same size and demographics are expected to perform. The opposite is true if the score is below the lower limit of the expected range (in the light blue); these are negative outliers. For scores within the expected range (in the grey), the score is what we would expect given the ICS's size and demographics.

### Comparability tables

The comparability tables show the 2021 unadjusted scores for this ICS for each scored question. The adjusted 2021 score will also be presented for each scored question along with the lower and upper expected range and national score. Scores above the upper limit of the expected range will be highlighted dark blue, scores below the lower limit of the expected range will be highlighted light blue, and scores within the lower and upper limit of the expected ranges will be highlighted grey.

### Sub-group breakdowns

Unadjusted scores are shown for tumour type, gender, age, IMD quintile and ethnicity breakdowns. Unadjusted scores for the same sub-group across different ICSs may not be comparable, as they do not account for the impact that differing patient populations might have on results.

### Tumour type tables

The tumour type tables show the unadjusted scores for each scored question for each of the 13 tumour groups. Central nervous system is abbreviated as 'CNS' and lower gastrointestinal tract is abbreviated as 'LGT' throughout this report.

### Age group tables

The age group tables show the unadjusted scores for each scored question for each of the eight age groups.

### Gender tables

The gender tables show the unadjusted scores for the following groups male; female; non-binary; prefer to self-describe; and prefer not to say.

### Ethnicity tables

The ethnicity tables show the unadjusted scores for six ethnicity groups.

### **IMD quintile tables**

The IMD quintile tables show the unadjusted scores for five quintiles based on relative disadvantage, with quintile 1 being the most deprived and quintile 5 being the least deprived.

### **Further information**

This research was carried out in accordance with the international standard for organisations conducting social research (accreditation to ISO20252:2012; certificate number GB08/74322). The 2021 survey data has been produced and published in line with the Code of Practice for Official Statistics.

For more information on the methodology, please see the Technical Document. It can be viewed along with the 2021 questionnaire and survey guidance on the website at [www.ncpes.co.uk](http://www.ncpes.co.uk). For all other outputs at ICS level, please see the Excel tables and dashboards at [www.ncpes.co.uk](http://www.ncpes.co.uk).

## Response Rate

### Overall Response Rate

690 patients responded out of a total of 1,341 patients, resulting in a response rate of 51%.

	Sample Size	Adjusted Sample	Completed	Response Rate
Overall response rate	1,426	1,341	690	51%
National	113,516	107,412	59,352	55%

### Respondents by Survey Type

	Number of Respondents
Paper	555
Online	131
Phone	3
Translation Service	1
<b>Total</b>	<b>690</b>

### Respondents by Tumour Group

	Number of Respondents
Brain / CNS	4
Breast	173
Colorectal / LGT	90
Gynaecological	37
Haematological	61
Head and Neck	18
Lung	20
Prostate	84
Sarcoma	6
Skin	21
Upper Gastro	36
Urological	60
Other	80
<b>Total</b>	<b>690</b>

## Respondents by Age and Gender

Respondents year of birth has been used to determine age. This information has been amalgamated into 8 age bands. The age and gender distribution for the ICS was as follows:

	Age 16-24	Age 25-34	Age 35-44	Age 45-54	Age 55-64	Age 65-74	Age 75-84	Age 85+	Total
Female	0	3	9	37	119	111	81	12	372
Male	1	2	3	19	62	113	75	14	289
Non-binary	0	0	0	0	0	0	0	0	0
Prefer to self-describe	0	0	0	0	0	0	0	0	0
Prefer not to say	0	0	0	0	0	0	0	0	0
Not given	0	0	3	2	4	11	4	5	29
<b>Total</b>	<b>1</b>	<b>5</b>	<b>15</b>	<b>58</b>	<b>185</b>	<b>235</b>	<b>160</b>	<b>31</b>	<b>690</b>

## Respondents by Ethnicity

	Number of Respondents
<b>White</b>	
English / Welsh / Scottish / Northern Irish / British	539
Irish	24
Gypsy or Irish Traveller	0
Any other White background	13
<b>Mixed / Multiple Ethnic Groups</b>	
White and Black Caribbean	3
White and Black African	1
White and Asian	2
Any other Mixed / multiple ethnic background	2
<b>Asian or Asian British</b>	
Indian	11
Pakistani	13
Bangladeshi	2
Chinese	2
Any other Asian background	4
<b>Black / African / Caribbean / Black British</b>	
African	4
Caribbean	19
Any other Black / African / Caribbean background	3
<b>Other Ethnic Group</b>
