

About the Cancer Patient Experience Survey

Cancer is a disease people can get. It can be very serious and can make you ill.

Every year, the NHS finds out what cancer patients think about their care and treatment.

Services can use people's answers to give better care and support to patients.

If you receive a survey in the post, please fill it in.

The survey is not in easy read so you may need help to fill it in.

If you have questions about the survey or need support, you can contact us.
